ErgoDek®

CF20

Stand-up setting tool for metal deck overlaps

Revolutionize your workspace

Ergonomic setting with ErgoDek®

Elevate your comfort and productivity with ErgoDek®. Our advanced system is designed to minimize strain and fatigue, ensuring comfort during extended use. With its innovative design, ErgoDek® significantly reduces installation time, allowing you to complete tasks more efficiently. Upgrade your workspace with ErgoDek® – where comfort meets productivity.

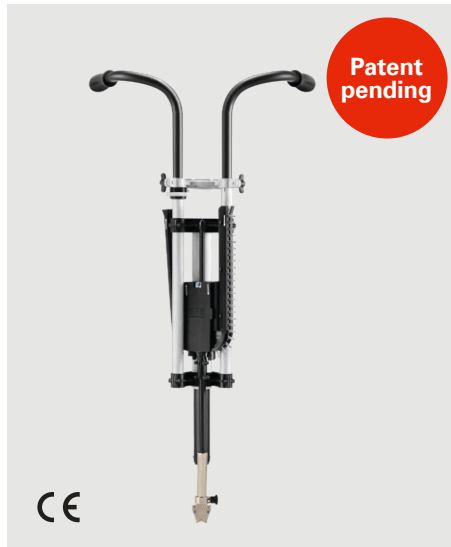

Compatible with collated fasteners, ErgoDek® enables a smooth and continuous workflow. For secure fastening of metal deck overlaps, use CDM-4.8×20-MED and SL2-4.8×20-MED fasteners.

Ergonomic Design

- Operates efficiently while standing, reducing strain
- Adjustable handle accommodates users of various heights for optimal comfort
- Designed to minimize fatigue during extended use

Lightweight

- Lightweight making it exceptionally easy to handle
- Effortless transportation and maneuverability on the job
- Compact size allows a convenient storage and use in tight spaces

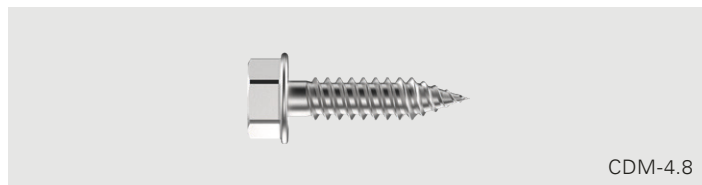

User-Friendly

- Comfortable to use with minimal pressure required during installation
- Compatible with various screwdrivers
- Used belts stand upright for easy collection, eliminating the need to bend over

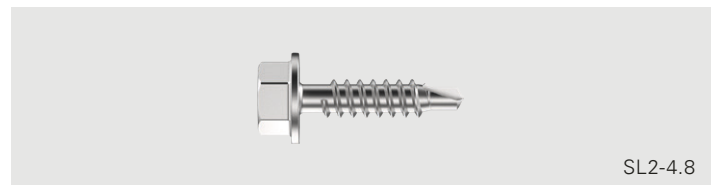

Highly Effective

- Dramatically reduces installation time, significantly improving efficiency
- Spare parts are easy and quick to replace, minimizing downtime
- Designed for use with collated fasteners, ensuring a continuous and smooth installation process

Fastening overlapping of metal deck

- Self-drilling fastener with FastTip®
- Carbon steel, Durocoat® 480
- HEX8 head, free-spin zone
- Drilling performance 2×1.25 mm

- Self-drilling fastener with drill point
- Carbon steel, Durocoat® 480
- HEX8 head, free-spin zone
- Drilling performance 2×1.25 mm
